LINKING SYSTEMS

GLOBAL ASSEMBLY SOLUTIONS

THE LINKSY GROUP

INNOVATION AS A MAJOR DRIVER... QUALITY AS A REQUIREMENT

The LINKSY Group finds its origins back in 1973 with the establishment of the company Soprima. Firstly distributor of technical adhesives, Soprima found its way in the 1980s towards the technology of pre-coating. As an automotive industry subcontractor, Soprima now develops many innovative applications to secure and seal threaded assemblies.

Back in 2010, Soprima moved closer to Prelok France to create the French leader of pre-coating.

With its experience of the automotive industry and its expertise in assembly solutions, the Group diversified in fastener systems supply by combining the companies Inserco Fasteners and then Foubert Visserie.

In 2017, the Group took the name of LINKSY taken from «Linking Systems» in order to improve communication with its 2,500 customers.

4 COMPANIES AT YOUR SERVICE

delivered each year

35 000
fasteners on stock

THE GROUP'S EXPERTISE

Linksy develops **innovative and efficient assembly systems** with its clients from standard fasteners to the development of special parts.

1

GLOBAL TECHNICAL SUPPORT

From co-designed components to delivery of production parts, we are present at every phase of your project.

2

GLOBAL ASSEMBLY SYSTEM

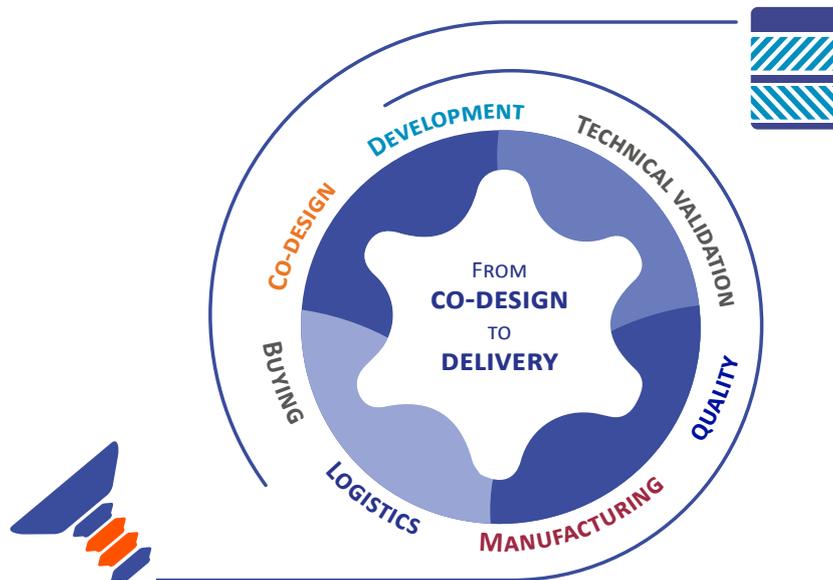

From standard fasteners to special parts, we provide all the necessary components for the assembly of your equipment.

3

GLOBAL SUPPLY CHAIN

From the small aerospace serie to the large automotive serie, we ensure a reliable and global service.

THE OVERALL APPROACH

INNOVATIVE SOLUTIONS

Our solutions use the latest technical innovations in the field of fasteners :

- Captive washers
- Innovative anti-corrosion treatments
- Integrated thread locking
- Sealing under head
- Anti-seize treatments, masking, protection, etc.

AN EFFICIENT QUALITY SYSTEM

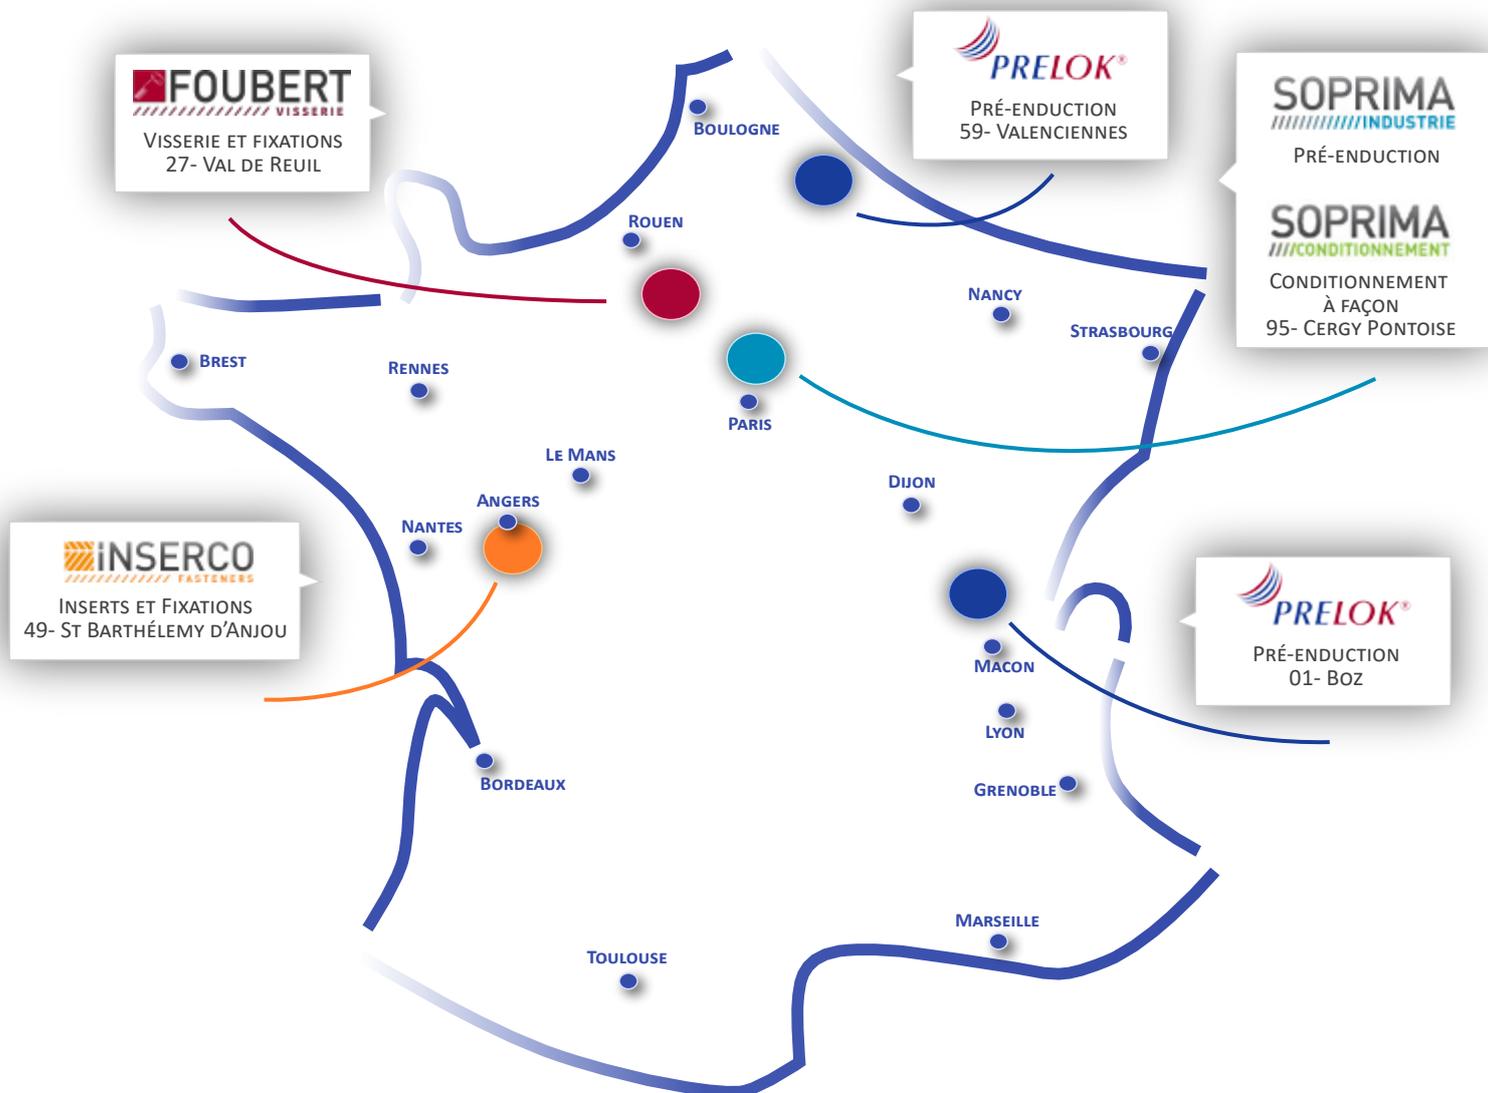

Run-in to the requirements of the automotive industry, our quality systems are **ISO 9001 certified** and compatible with **TS16949** and **EN9100**.

THE ADVANTAGES OF AN OVERALL APPROACH

- A single contact person for the entire value chain, from design to supply of parts.
- An expert partner to optimize the assembly of your products
- A technical and regulatory support for all the services of the company
- The reliability of a certified supplier for the quality of its products and its organization
- Skills validated by long experience of automotive and aerospace projects
- Reduction of the overall cost of assembly systems
